

Hands on Activity 1.2 – Familiarization of Basic C++ codes

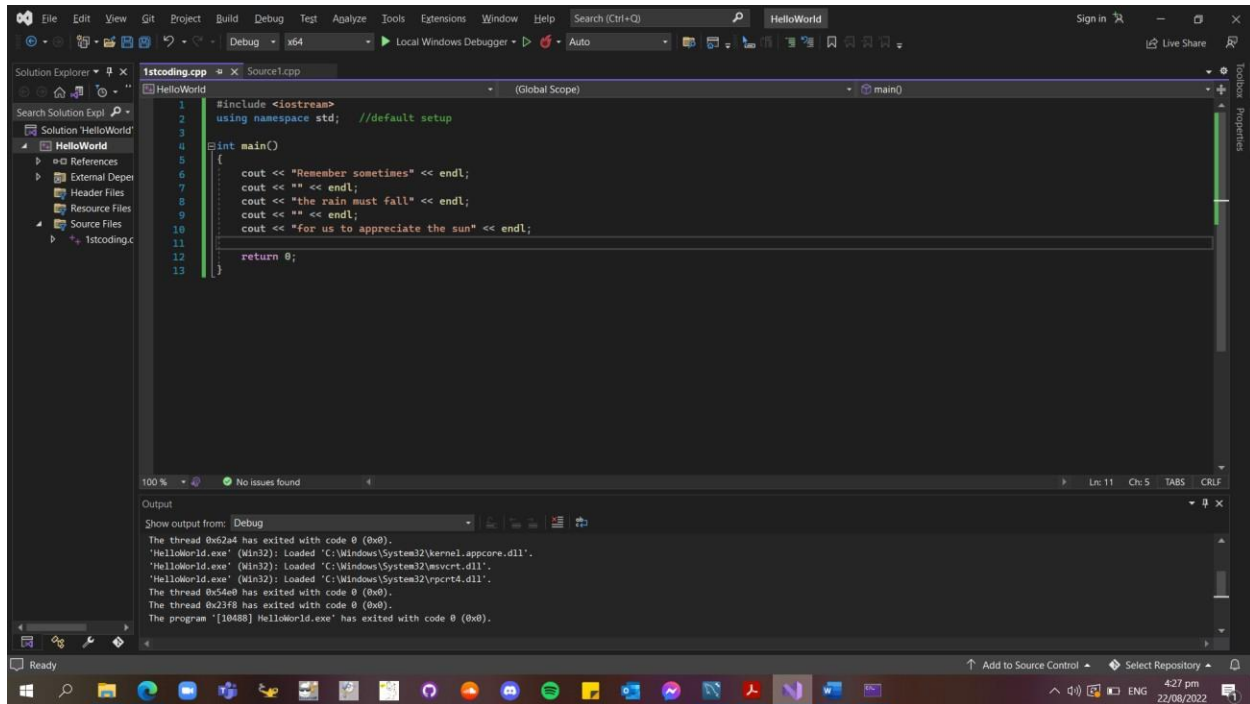

Bautista, Rizelle B.

08/22/2022

CPE11S5-A22

Engr. Ryan Francisco

ACTIVITY A

```
1 #include <iostream>
2 using namespace std; //default setup
3
4 int main()
5 {
6     cout << "Remember sometimes" << endl;
7     cout << "" << endl;
8     cout << "the rain must fall" << endl;
9     cout << "" << endl;
10    cout << "for us to appreciate the sun" << endl;
11
12    return 0;
13 }
```

Output

Show output from: Debug

The thread 0x62d4 has exited with code 0 (0x0).

'HelloWorld.exe' (Win32): Loaded 'C:\Windows\System32\kernel.appcore.dll'.

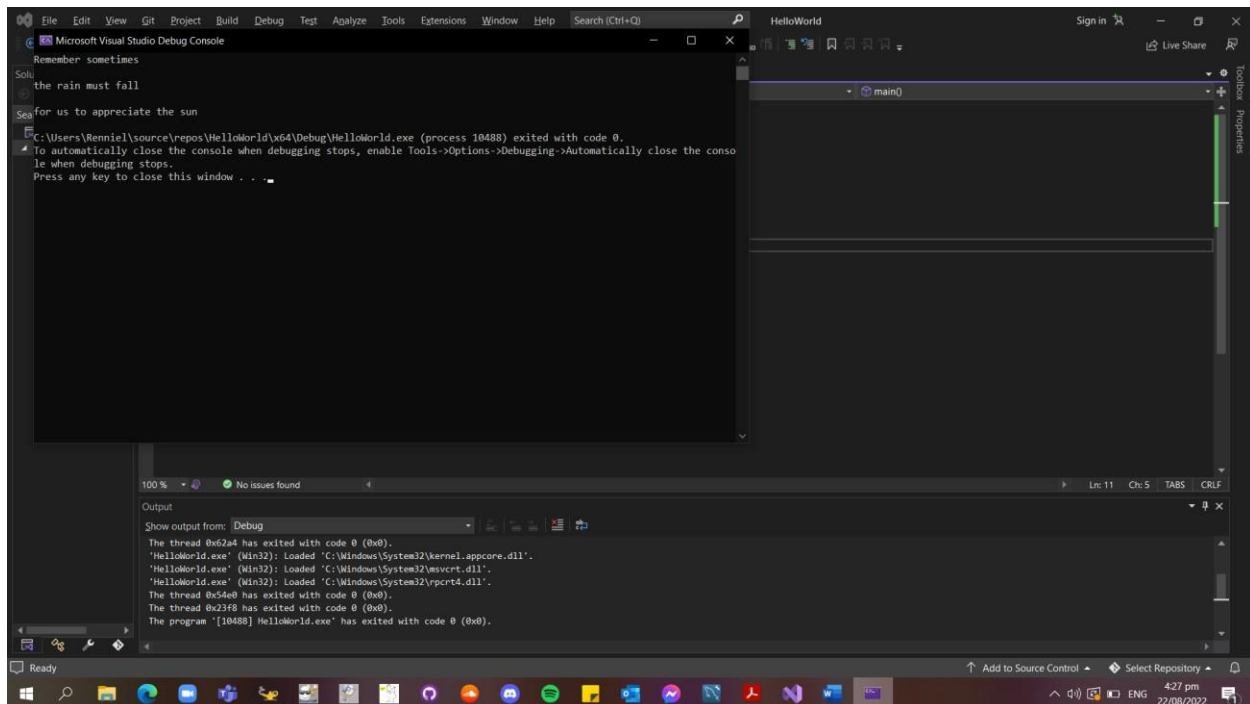

'HelloWorld.exe' (Win32): Loaded 'C:\Windows\System32\msvcrt.dll'.

'HelloWorld.exe' (Win32): Loaded 'C:\Windows\System32\RPCRT4.dll'.

The thread 0x54e0 has exited with code 0 (0x0).

The thread 0x23f8 has exited with code 0 (0x0).

The program '[10488] HelloWorld.exe' has exited with code 0 (0x0).

Remember sometimes

the rain must fall

for us to appreciate the sun

C:\Users\Renniel\source\repos\HelloWorld\Debug\HelloWorld.exe (process 10488) exited with code 0.

To automatically close the console when debugging stops, enable Tools->Options->Debugging->Automatically close the console when debugging stops.

Press any key to close this window . . .

Output

Show output from: Debug

The thread 0x62d4 has exited with code 0 (0x0).

'HelloWorld.exe' (Win32): Loaded 'C:\Windows\System32\kernel.appcore.dll'.

'HelloWorld.exe' (Win32): Loaded 'C:\Windows\System32\msvcrt.dll'.

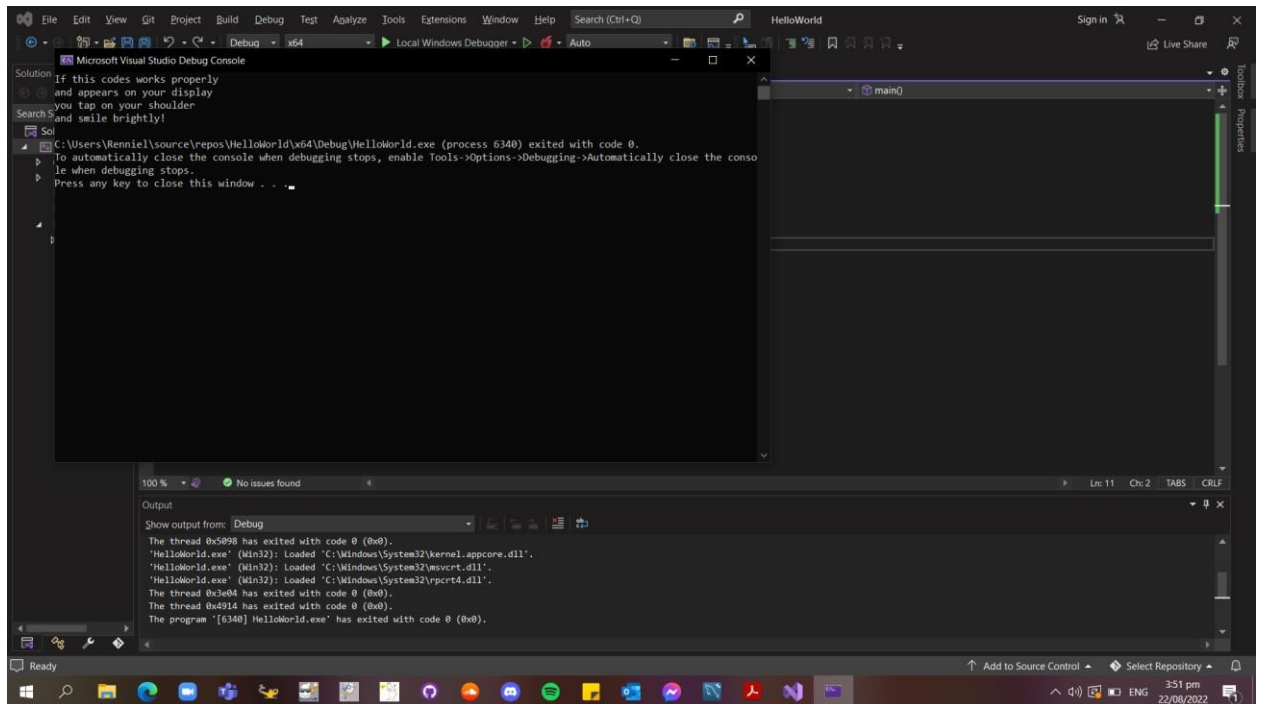

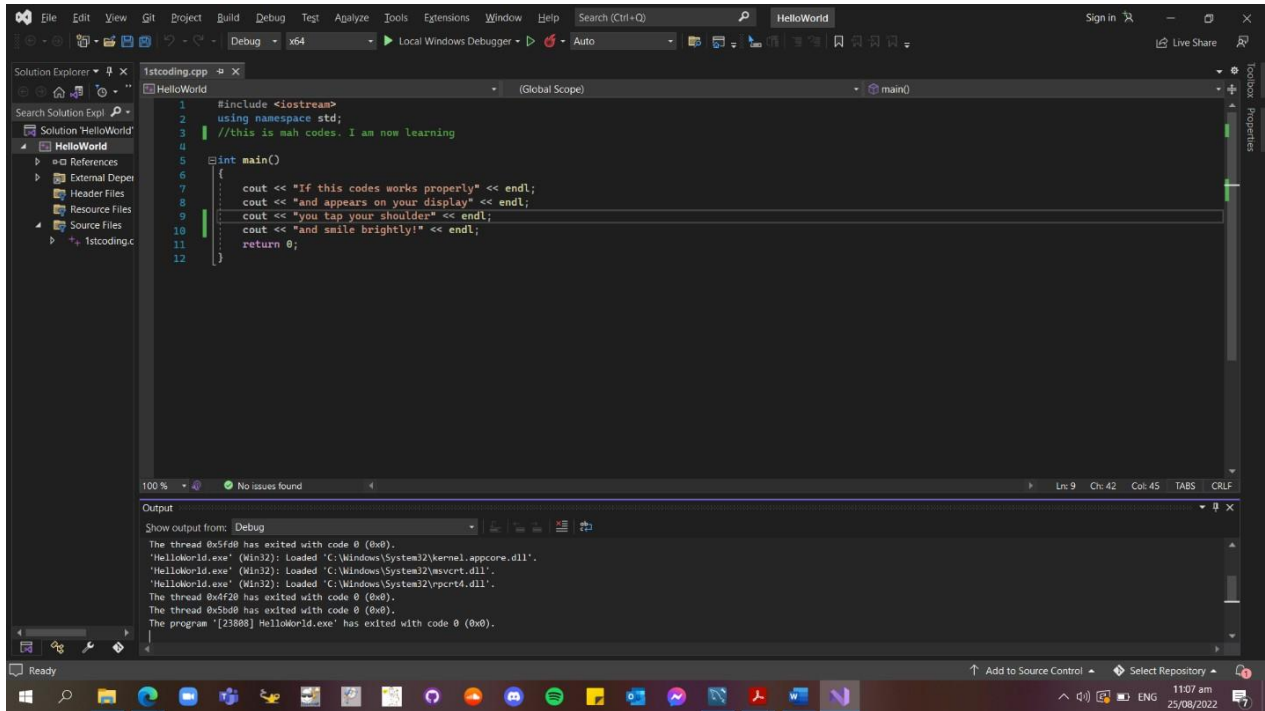

'HelloWorld.exe' (Win32): Loaded 'C:\Windows\System32\RPCRT4.dll'.

The thread 0x54e0 has exited with code 0 (0x0).

The thread 0x23f8 has exited with code 0 (0x0).

The program '[10488] HelloWorld.exe' has exited with code 0 (0x0).

ACTIVITY B

Conclusions:

As of now, we're learning the basics of C++ coding and it is easy to follow and understand. I've learned that you need to input 'endl;' if you want to insert a new line character. If you don't put endl; your code or statement will be continued in the same line. I've also learned If you want to comment on your code you need to input '/' or '/*...*/'. Two (2) slash // means single line comment while slash and asterisk /* means multi-line comment. The cout or console output designates an object responsible for output. The two less-than symbols, <<, means that characters are being "pushed" to the output stream. I've also learned about the differences of istream, ostream, iostream. The istream means input stream, its purpose is to read the input as sequence of character. The ostream means output stream, its purpose is to print word or formatting output. Last is the iostream, it is the combination of input and output stream. Its purpose is to handle both istream and ostream.

I affirm that I will not give or receive any unauthorized help on this activity/exam and that all work will be on my own.
